

Why such confusion regarding "local" channel availability in the 92028 zip code? Dish TV offers San Diego as local channels, DirectTV only offers Los Angeles as local channels. Fallbrook is not only in San Diego County, but is 2 counties away from Los Angeles! DirectTV is telling us that the FCC regulations disallows us our own local stations, i.e. San Diego, and forces us to use Los Angeles. Any feed-back on this situation?
